* . . . with the anti-vibration AV-handle! You will find all of the interesting details regarding STIHL power chain saws with AV-handles, outlined in this loose-leaf booklet.

D8/65

Shock absorbers strategically positioned at the 3 suspension points absorb and reduce engine and chain vibration.

999920-1.M5.M9. Printed in West Germany

The anti-vibration handle (called "AV-handle") is an exclusive and patented STIHL development. It is possible to cut with it for hours with a minimum of muscle fatigue, because shock absorbers strategically positioned at 3 suspension points absorb vibrations from the engine and chain. This gives you the smoothest, easiest handling saw in the field and only STIHL has it!
